Skills

- **React Native**
- **JavaScript**
- **HTML & CSS**
- **React Js**
- **GitHub**
- **Redux Toolkit**

Profile

As a Software Developer, I possess an impressive arsenal of skills in HTML, CSS, JavaScript, React, React Native. My expertise lies in crafting dynamic, engaging interfaces through writing clean and optimized code and utilizing cutting-edge development tools and techniques.

Projects

Real-Time Chat Application

React Native , Express.js, Firebase and MsSQL

Built a responsive, real-time chat application with a mobile-first approach, supporting instant messaging, notifications, and user management.

Real-Time Messaging: Leveraged Socket.io for low-latency message delivery, providing instant message updates and read receipts. User Authentication: Integrated Firebase Authentication for secure login and registration. Push Notifications: Utilized Firebase Cloud Messaging for real-time alerts on new messages and updates.

Experience

Kodukku classifieds private limited - 6 Months

Marketing Application with Real-Time Chat   **React Native, Express,js**

- Contributed to the development of a comprehensive HRMS and marketing mobile application, including an integrated chat module, built to enhance internal communications and streamline HR and marketing workflows.

Tech Stack:

- Frontend: React Native for a cross-platform. Backend: Express.js with Socket.io for real-time chat and data synchronization. Database: MS SQL for structured data storage, Firebase for user authentication and real-time data handling. Notifications: Firebase Cloud Messaging for push
- notifications, providing real- time message and update alerts.
